Additionally, full-text and reference retrieval systems have been employed to expand the search.*

## Note

Whenever retrievable, URLs for freely available versions of subscription-based publications have been provided. Thanks to the Open Access movement, self-archiving of publications in institutional repositories or on author homepages for free public use (so-called Green Open Access) has become more common. Please note, that the content of Green Open Access documents is not necessarily identical to the officially published versions (e.g., in case of pre-prints); it might therefore not have passed through all editorial stages publishers employ to ensure quality control (peer review, copy and layout editing etc.). In some cases, articles may only be cited after getting consent by the author(s).

**About the compiler: Judith Tinnes, Ph.D.**, studied Information Science and New German Literature and Linguistics at the Saarland University (Germany). Her *doctoral thesis* dealt with Internet usage of Islamist terrorists and insurgents. Currently she works in the research & development department of the Leibniz Institute for Psychology Information ([ZPID](http://www.zpid.de)). She also serves as Editorial Assistant for 'Perspectives on Terrorism'.
