Abstract

This bibliography contains journal articles, book chapters, books, edited volumes, theses, grey literature, bibliographies and other resources on the field of Terrorism Research, its sub-disciplines (such as Critical Terrorism Studies), and related disciplines (such as Security Studies), central approaches, theories, methods, and research topics. More recent publications have been prioritized during the selection process. The literature has been retrieved by manually browsing more than 200 core and periphery sources in the field of Terrorism Studies. Additionally, full-text and reference retrieval systems have been employed to expand the search.

Keywords: *bibliography; resources; literature; terrorism research; terrorism studies; approaches; theories; methods; research topics*

NB: All websites were last visited on 13.03.2016. This subject bibliography was preceded by an earlier part ([Part I](#)). Note

Whenever retrievable, URLs for freely available versions of subscription-based publications have been provided. Thanks to the Open Access movement, self-archiving of publications in institutional repositories or on author homepages for free public use (so-called Green Open Access) has become more common. Please note, that the content of Green Open Access documents is not necessarily identical to the officially published versions (e.g., in case of pre-prints); it might therefore not have passed through all editorial stages publishers employ to ensure quality control (peer review, copy and layout editing etc.). In some cases, articles may only be cited after getting consent by the author(s).
